PD/RH

This is an anteroposterior (AP) radiograph of a right knee joint. The image shows the distal femur at the top, the patella (kneecap) in the center, and the proximal tibia (shin bone) at the bottom. The joint space is visible between the femur and tibia. There is a small, dark, linear artifact or foreign body visible within the joint space, possibly a needle or wire. The surrounding soft tissue and bone structures are clearly visible.
