| Executed on: | 21/05/2025 |
| Name: | Liberty-wish T |
| Chip Number: | 528210004438730 |
| UELN Number: | NL003201607684 |
| Origin: | Harley Vdl x Ultimo |
| Sex: | F |
| Birthdate: | 24/07/2016 |
| Colour: | Dark chestnut |

A clinical and X-Ray examination was performed.

Clinical Examination:

| | |
|---------------------------------|--------|
| Conformation and stand: | normal |
| Nutritional Status: | normal |
| Skin and coat: | normal |
| Mucous membranes: | normal |
| Lymph Nodes: | normal |
| Eyes: | normal |
| Mouth: | normal |
| <u>Cardiovascular System</u> | |
| Heart rate at rest: | normal |
| Heart rate after exercise: | normal |
| Jugular vene: | normal |
| <u>Respiratory System</u> | |
| Respiration at rest: | normal |
| Respiration after exercise: | normal |
| Spontaneous coughing: | normal |
| Larynx sensitivity: | normal |
| Type of respiration: | normal |
| <u>Digestive System:</u> | normal |
| <u>Urogenital System:</u> | normal |
| <u>Nervous System:</u> | normal |
| <u>Inspection and Palpation</u> | |
| Head: | normal |
| Neck | normal |
| Withers: | normal |
| Back: | normal |
| Croup: | normal |
| Left front limb | normal |
| Right front limb: | normal |
| Left hind limb: | normal |
| Right hind limb: | normal |
| Fore and Hind Hooves | |
| Horn quality: | normal |
| Hoof percussion: | normal |
| Size and shape: | normal |
| Fore and Hind Shoeing: | normal |
| Scars: | normal |

**Gait:**Walking on hard surface

| | |
|---------------------|--------|
| Straight line: | normal |
| Small circle left: | normal |
| Small circle right: | normal |
| Walking backwards | normal |

Trotting on hard surface

| | |
|---------------------|--------|
| Straight line: | normal |
| Small circle left: | normal |
| Small circle right: | normal |

Trotting on soft surface

| | |
|---------------------|--------|
| Small circle left: | normal |
| Small circle right: | normal |

Cantering on soft surface

| | |
|---------------------|--------|
| Small circle left: | normal |
| Small circle right: | normal |

Flexion Tests:

Forced Flexion

| | |
|-----|---------------|
| LF: | not sensitive |
| RF: | not sensitive |
| LH: | not sensitive |
| RH: | not sensitive |

Trotting Away

| | |
|-----|----------|
| LF: | not lame |
| RF: | not lame |
| LH: | not lame |
| RH: | not lame |

X-Ray Examination

| | |
|---------------|---|
| Navicular LF: | No significant abnormalities |
| Navicular RF: | No significant abnormalities |
| Foot LF: | No significant abnormalities |
| Foot RF: | No significant abnormalities |
| Pastern LF: | No significant abnormalities |
| Pastern RF: | No significant abnormalities |
| Fetlock LF: | slight lipping |
| Fetlock RF: | No significant abnormalities |
| Carpus LF: | No significant abnormalities |
| Carpus RF: | No significant abnormalities |
| Fetlock LH: | No significant abnormalities |
| Fetlock RH: | No significant abnormalities |
| Tarsus LH: | No significant abnormalities |
| Tarsus RH: | No significant abnormalities (small contour defect MTR) |
| Stifle LH: | No significant abnormalities |
| Stifle RH: | slight remodelling medial tibia |
| Neck: | No significant abnormalities |
| Back: | No significant abnormalities |

Other radiological examinations: no.

Other findings and remarks: no

During the examination there were no indications of vices.

After the examination blood samples were taken for investigation of banned substances.

**Equine Care Group**Frederik BRUYNINX, *DVM*Werner RESSELER, *MVetMed PgCert CertAVP(Orth)***Final Conclusion:**

Good, sound impression. Some minor remarks on radiography. The horse receives a normal medical risk.

Kind regards,

Werner Resslerer

**Terms and conditions**

A prepurchase or sale examination gives only my personal assessment of the current medical condition of the horse. Linked is a type of risk assessment of medical problems that can happen regarding the use of the horse.

This examination has several limitations:

- Each exam is a snapshot. Any horse can at one moment seem very healthy, or at another limping, showing heart murmurs or respiratory distress. This difference may be due to coincidence, occurred after injury or illness, changes in housing, whether or even drug camouflage prior to the exam.
- If the customer wants it, there is the possibility to include a blood sampling to detect illegal substances.
- It deals no obligation towards any results. The horse is examined in function of a client and the purpose for which the horse will be used. This exam and the standards used for it, can therefore vary between clients and horses. This report is therefore only applicable to no one else than the person stated on the report.
- The client agrees with the extent of the investigation, and realizes that this is always a compromise between risk-limitation and price for the exam. If for example an additional endoscopy or additional X-rays are desirable, this can be asked in advance or during the exam.
- The standards used in the radiographic examination can be different from those used by colleagues or universities and can differ between what is common in different countries. There are only those findings indicated that I believe are important. Deviations that I believe have no interest are not mentioned. Example: fragments at the distal border of the navicular bone (with or without a recess in the navicular bone itself), ossification of the hoof cartilage, etc.
- Since this exam is no research addressing the capabilities of the horse as a riding or sport horse... Neither is it a valuation of the horse.
- It cannot clearly demonstrate whether the horse might have had surgery or other treatments, such as repeated infiltration of the joints, colic surgery, ... Hence it is the sole responsibility of the purchaser to cover himself here.
- It is also the sole responsibility of the purchaser to cover himself in terms of stable vices such as: crib biting, wind sucking, weaving ...
- The buyer must be aware that some diseases are seasonal, so they may not be present at the time of the inspection. (for example summer itch, headshaking, ...) About this aspect he must cover himself as well.
- If the buyer wants to insure the horse, he will have to wait before buying it, until he has the approval of the insurance company. A test conducted by myself, is not automatically an approval for an insurance company. They may have different standards.
- This exam gives you no advice as a future stallion, because the standards used for this can vary between the different studbooks.
- It is also the buyer's full responsibility to receive the full ownership papers including the "mutatie luik" of the horse.
