NAME OF THE HORSE : ATHENA

EXTRAHORSE SALE — Clinical and Radiographic Exams Report

Clinical Exam — Horse Identification

Horse Details

NAME OF THE HORSE : ATHENA

SIRE N° :

MICROCHIP N° : 276020000095409 1

DATE OF BIRTH : 22/05/2023

Sex : ☑ Female ☐ Stallion ☐ Gelding

Testis : ☐ None ☐ Abnormalities ☐ No Abnormalities

General

Build and posture : (Good) Moderate Bad

Body conditions : Good BCS 4,5/9

Jugular vein : (Normal) Deviant :

Mouth exam : (Normal) Deviant Remark : wolf teeth

Piroplasmosis Test /Babesia/Theileria : test type: Results:
cELISA
Negative

Uptodate vaccination: (FLU) (EHV 1,4) (VET) other:

Pruritus sign

☑ No ☐ Yes

Remark :

Sarcoïd

☑ No ☐ Yes

Remark :

Tail and hair problem

☑ No ☐ Yes

Remark :

Eyes Exam

Cornée : ☑ Normal ☐ Abnormal

Anterior chamber - iris - lens: ☐ Normal ☐ Abnormal

Locomotion & Cardio-Respiratory Exam

Locomotion, Angular Deviation & Muscular Exam

Angular limb

☑ Normal ☐ Abnormal
Remark :

Hoof size

☑ Equal ☐ LF>RF or RF>LF
Remark :

Pelvis

☑ Symmetric ☐ Asymmetric
Remark :

Muscular atrophy

☑ No ☐ Yes
Remark :

Straight line WALK hard surface : ☑ Normal ☐ Abnormal
Remarks :

« 8 » at walk : ☑ Normal ☐ Abnormal
Remarks :

Straight line TROT hard surface : ☑ Normal ☐ Abnormal
Remarks :

Trot: circle left and right soft surface : ☑ Normal ☐ Abnormal
Remarks :

Canter: Circle left and right soft surface : ☑ Normal ☐ Abnormal
Remarks :

Trot: circle left and right hard surface : ☑ Normal ☐ Abnormal
Remarks :

Coordination abnormality (nervous system) : ☑ No ☐ Suspect ☐ Yes

Dynamic flexion test (RF/LF/HR/HL) : ☑ Negative ☐ Positive :

Remarks :

Cardio-Respiratory Exam

Before Training

Heart : ☑ Normal ☐ Abnormal *Remark :*

Respiration : ☑ Normal ☐ Abnormal *Remark :*

During & After Labour

Heart : ☑ Normal ☐ Abnormal *Remarks :*

Respiration : ☑ Normal ☐ Abnormal *Remarks :*

Additional Noise : ☐ Yes ☑ No *Remarks :*

Cough : ☐ Yes ☑ No *Remarks :*

Conclusion of Clinical and Radiographic Exams

Following the examinations carried out today, our findings regarding the health status of this horse with a view to its intended future use are as follows:

☒ 0 (circled)
Absence of clinical anomaly or lesion incompatible with intended use.

☐ 1
Presence of minor abnormality, frequently encountered in horses performing well in the discipline envisaged.

☐ 2
Presence of clinical abnormality or lesions that may be encountered on horses performing well in the discipline envisaged, the management of which requires appropriate medical and/or surgical care and/or special shoeing.

☐ 3
Presence of clinical abnormality or lesions likely to compromise the horse's future use.

Recent studies show that the average X-RAYS score of a 3-year-old population of sport horses is close to 5.

The conclusion of these exams results from the conditions under which the examination was carried out. It is established on the basis of a clinical and/or radiographic examination only. It does not prejudge the future evolution of the horse's condition, nor its ability to perform at the level envisaged. This certificate does not engage the responsibility of the veterinarian beyond the findings recorded on the day of the examination.
